Zombie Apocalypse Kit Label from ComicConFamily.com  
(Part 2: Right Side of Label)

Cut off all white edges. Make a small cut in label from edge into the area where the arrow points and cut out the white circle. This will allow you to fit the label around the area where the handle attaches to the paint can. Adhere this label to can with tape, making sure the circle cut-out is evenly around area where handle attaches on right side of can.
